

# Audatex *Estimating*™

## How to Update Audatex Estimating using AudaUpdate for Multi-User Install

**Note:** Go to [MySupportGarage.com](http://MySupportGarage.com) to view the video of these instructions.

When launching Audatex Estimating after a new version of Audatex Estimating has been retrieved by AudaUpdate, users will see the following screen:

1. Click the **OK** button on the message.
2. Log out of **Audatex Estimating** (on all workstations).
3. Close out all **Internet Explorer** windows.

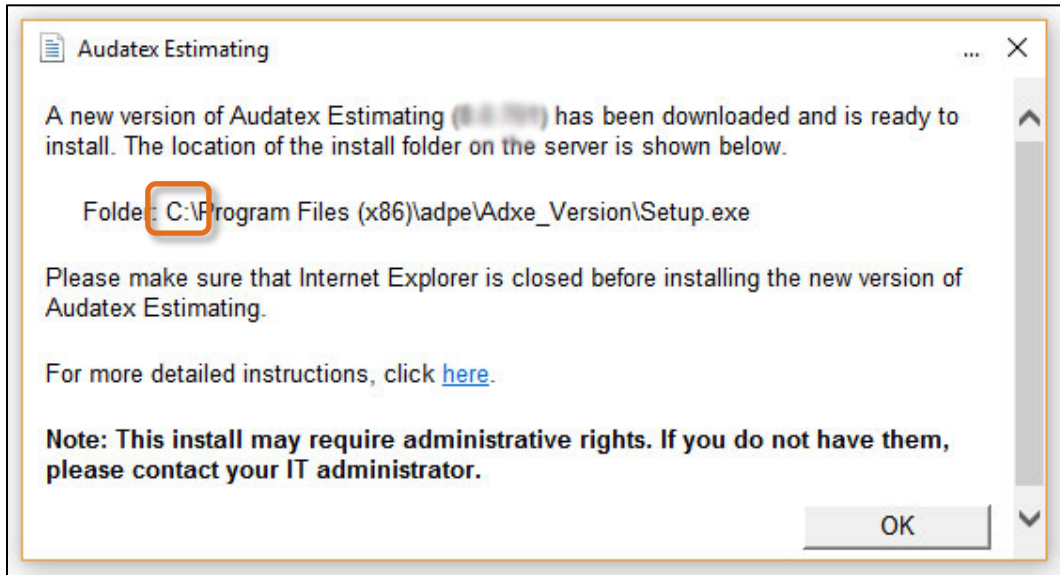

**Note:** Perform the following steps on the Server Machine where Multi-user Audatex Estimating is installed.

4. Click the **folder** icon in the **task bar** (Windows 10) on the server machine.

5. Double click on the **Disk Drive** which is shown in the notification message.  
**For example:**

6. Double click on **Program Files (x86)**.

10. Left click **Run as administrator**.

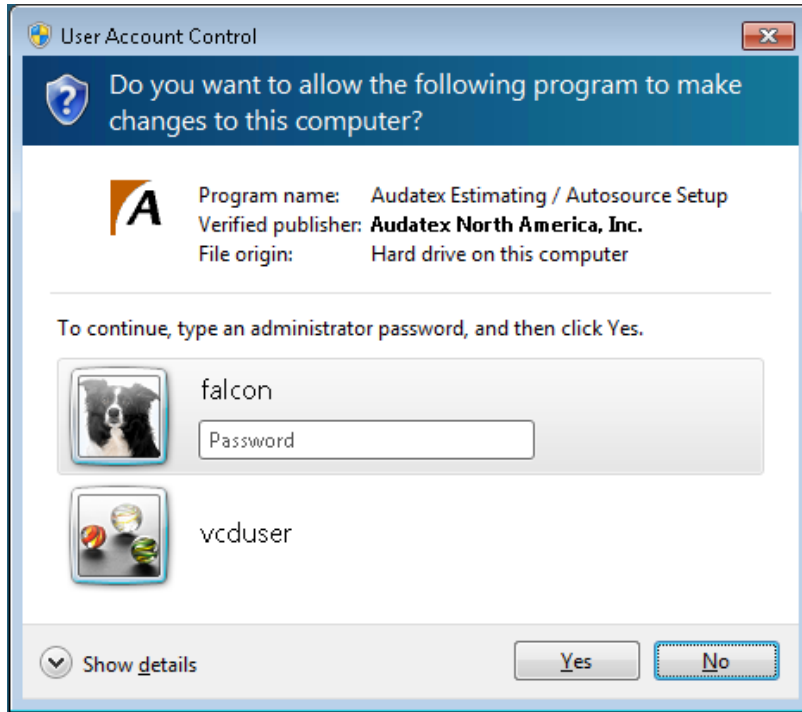

11. As noted in the message, there may be one of two methods of installation depending on how Windows is configured:

- 1) When Windows asks to confirm the installation, click the **Yes** button and then move to **Step 12**.

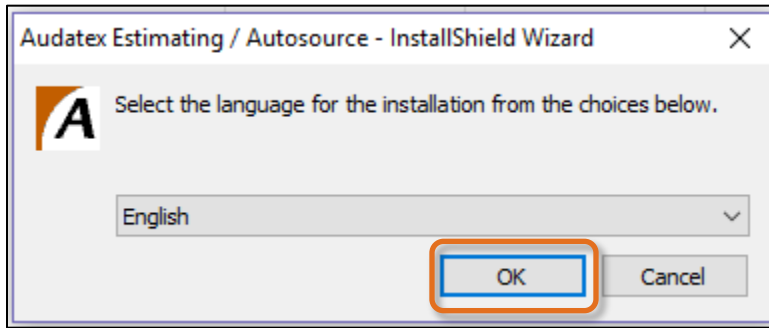

~OR~

- 2) When Windows requires a User ID/Password for Administrative privileges, contact the internal IT department.

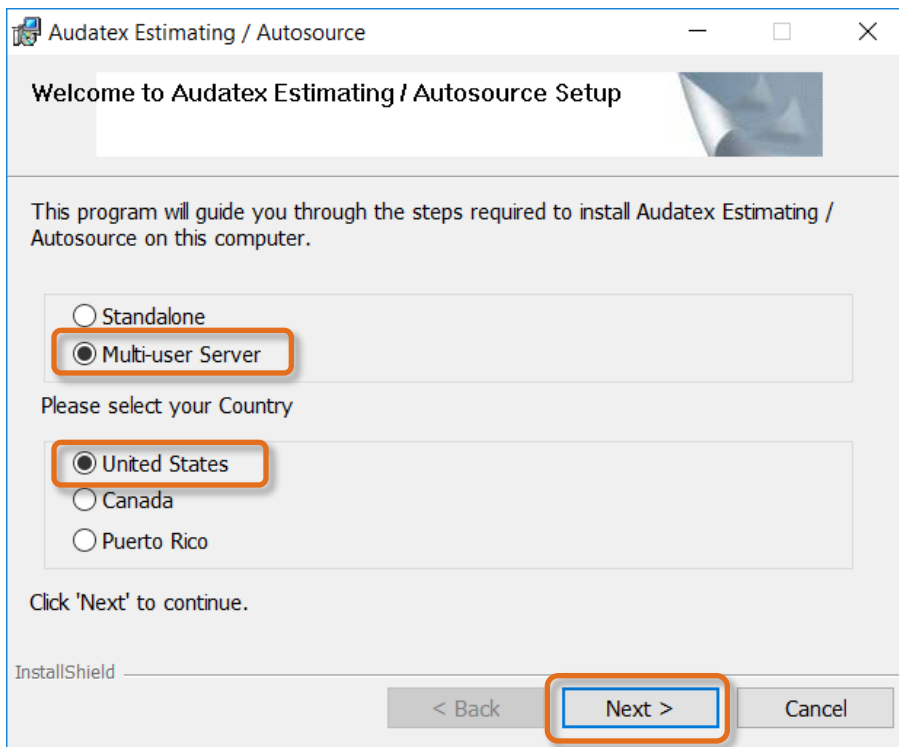

12. Select the language from the drop-down list and click the **OK** button.

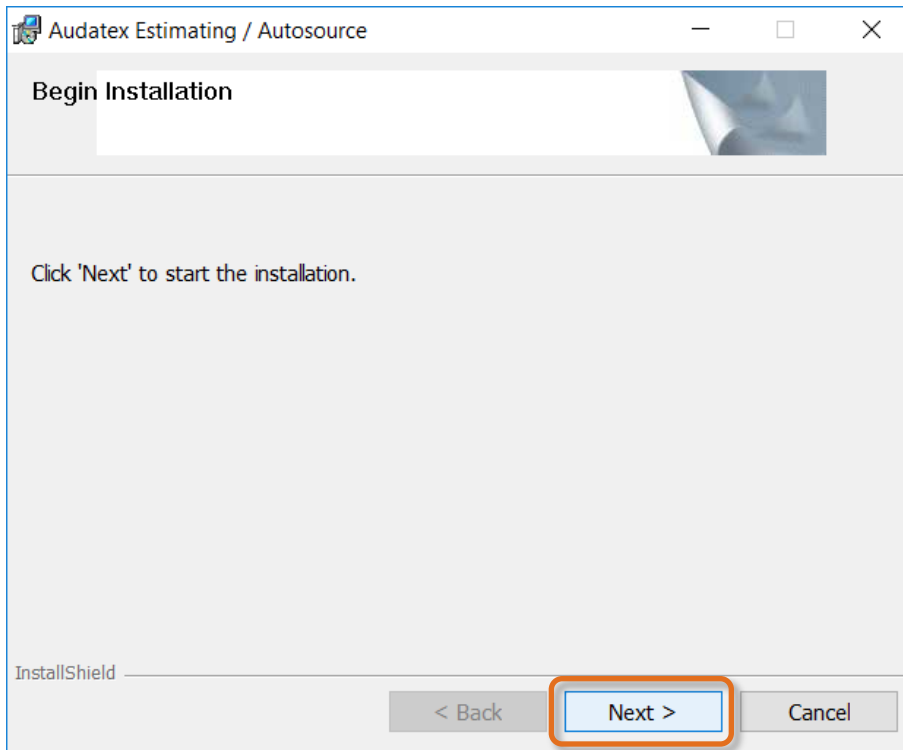

13. Click the **Multi-user Server** radio button and select the country.

14. Click the **Next** button.

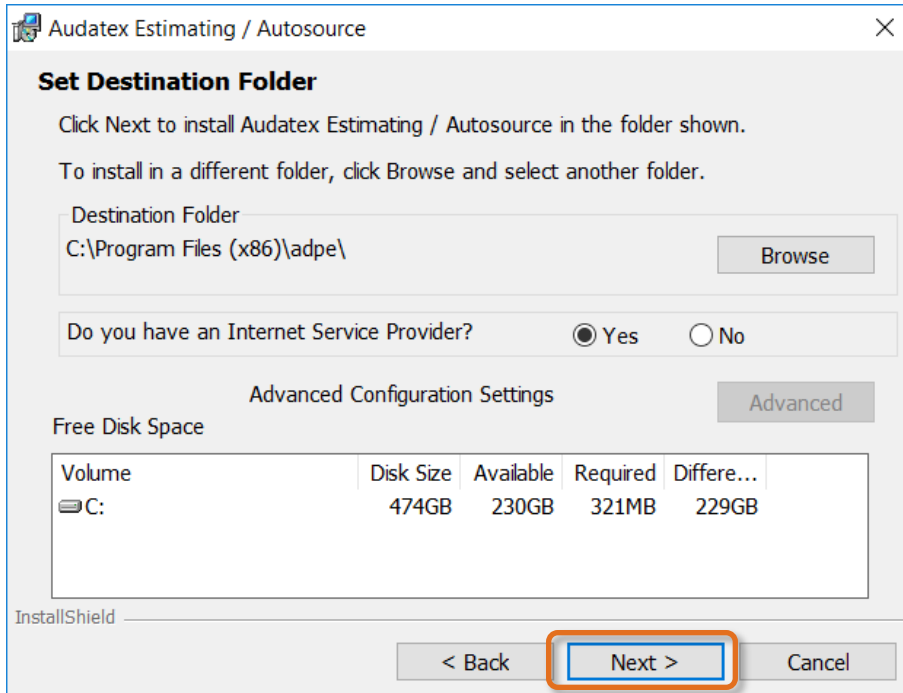

15. Click the **Next** button to start the installation process.

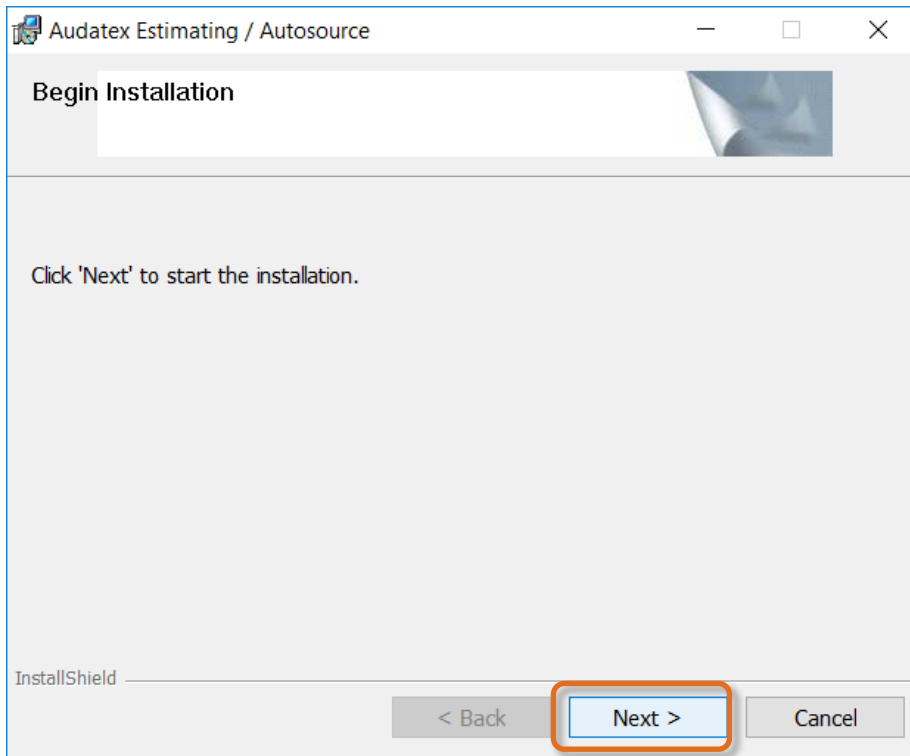

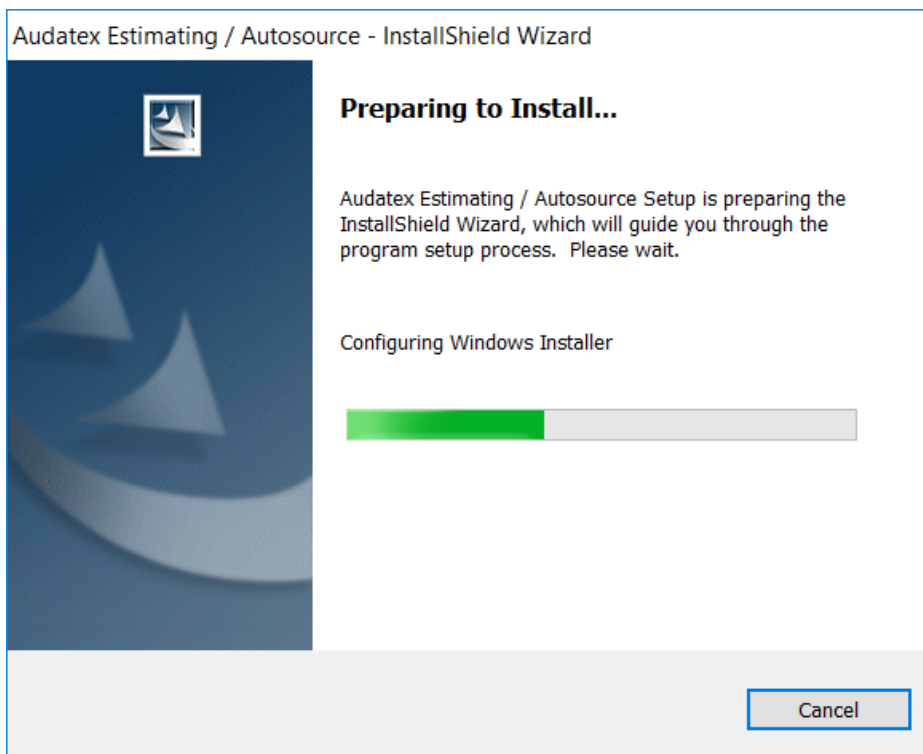

16. Click the **Next** button.

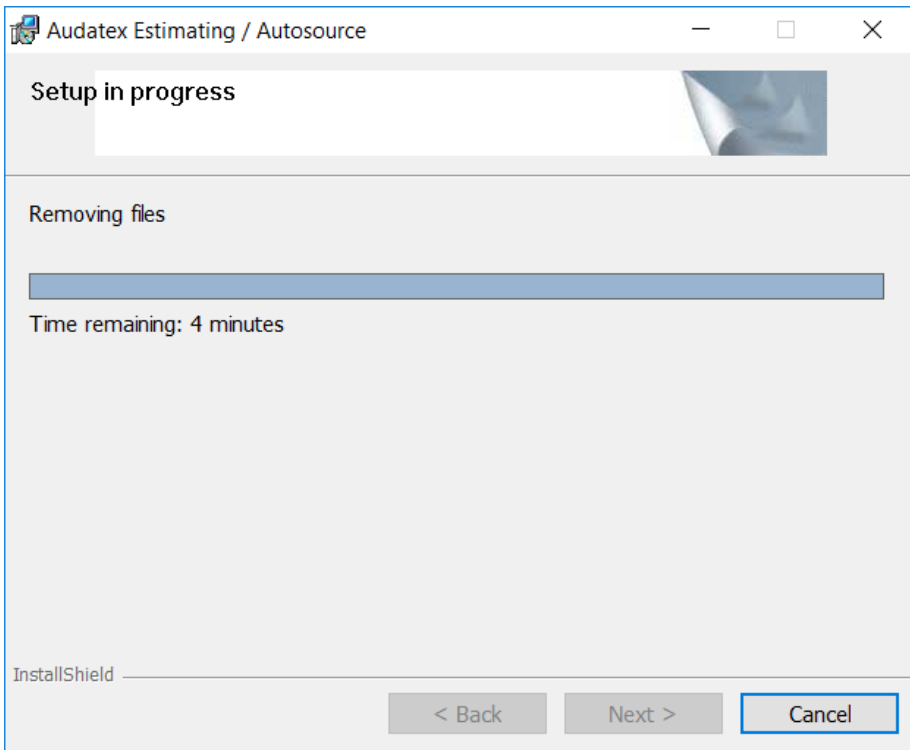

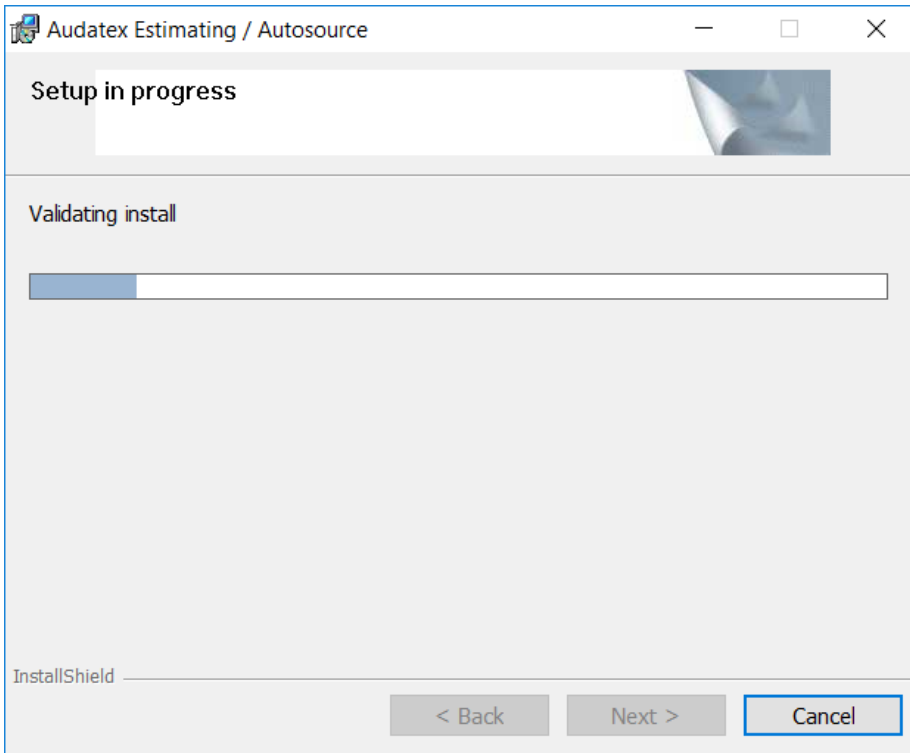

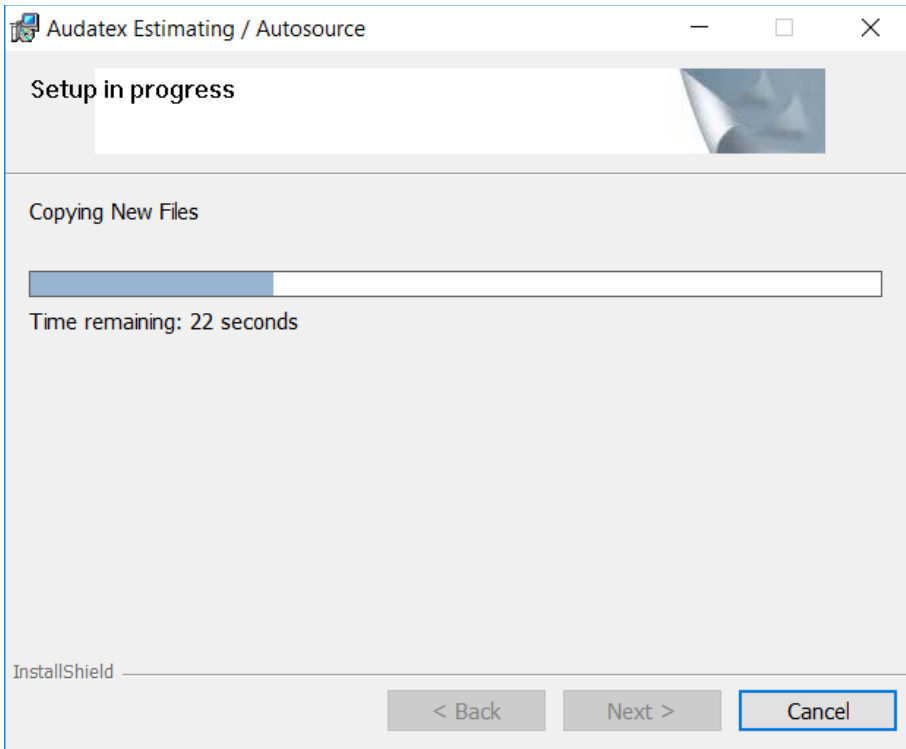

17. Click the **Next** button to start installation.

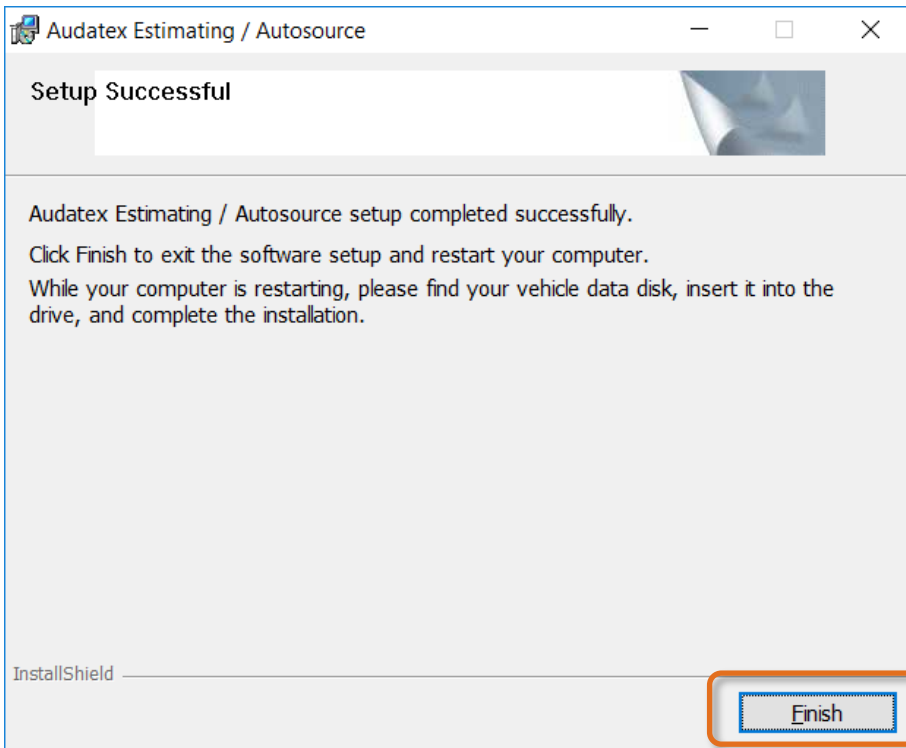

18. The install process will go through a series of screens as shown below.

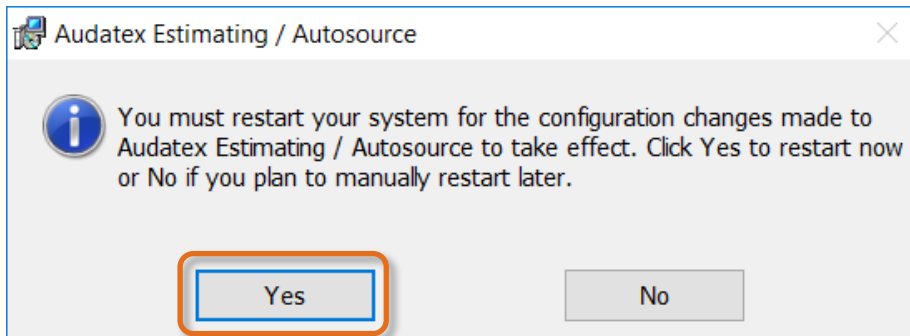

19. Click the **Finish** button.

20. Click the **Yes** button to restart the computer.
