How to Uninstall Windows Updates from Programs and Features

1. Open the **Control Panel**.
2. Click **Programs and Features**.

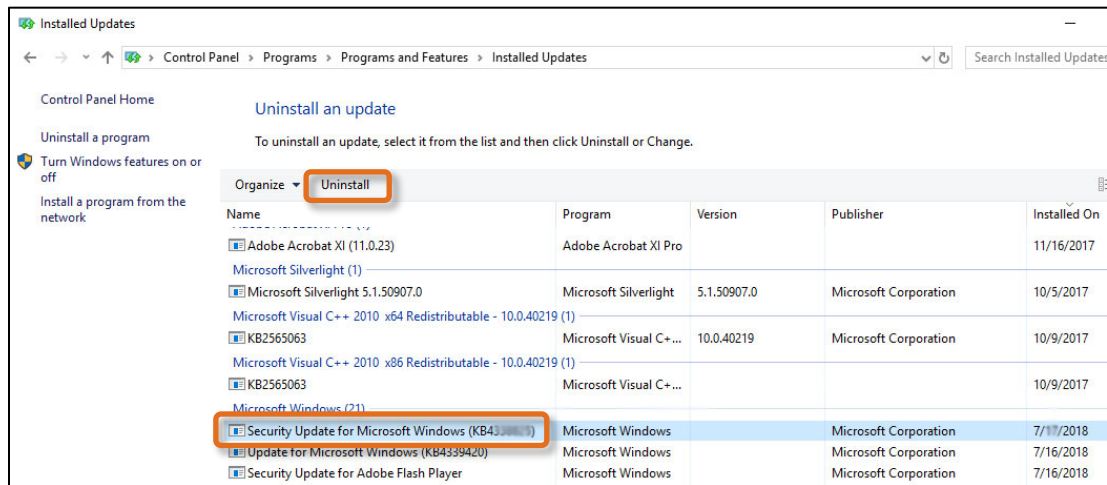

3. Click the **View installed updates** link.

4. Click the update, in this case select **Security Update For Microsoft Windows (KB4338819)**.
Note: The date of install for this update was 07/10/2018.

5. Click the **Uninstall** button.

6. When unsure which update caused the problem, look at the date in the **Installed On** column.
Note: Click the drop-down on the **Installed On** column to select only the updates that were installed on a particular date or range.
